Volume LXXXII Issue 2

FROM THE PRESIDENT'S PERCH

THE FUTURE OF THE OVERPECK PRESERVE AND ITS WILDLIFE IS IN OUR HANDS

On the other side of the water, across from the New Overpeck County Park, behind the Bergen Equestrian Center, lies an almost forgotten area of the Bergen County Park system, once known as The Overpeck Preserve.

A Place that will Determine the Future of our Birds, Wildlife and our Quality of life for Generations to Come!

This was once considered a nature preserve. A place once open to field trips and watched over by Gil Hawkins, director of the Overpeck Preserve, now closed to the public for almost 15 years. Just about an out of sight memory, it looks more like the lunar surface than a future park land. Today the area technically referred to as AREA 4 of Overpeck County Park is under remediation (the closing and capping of the landfill) because like many places in the New Jersey Meadowlands region, the Overpeck was once a dumping ground. As the remediation comes closer to completion on this almost 100 acres of County parkland, the critical next step of the restoration plans will be discussed. All of us should be kept aware about how those plans are made and how that area will be restored as it will determine the future of New Jersey's wildlife and also the quality of life of the people that live in the region for many generations to come.

Why is the Area so Important ?

The Overpeck Creek is a tributary of the Hackensack River and is part of the extended tidal estuary of the lower tidal Hackensack Meadowlands. About 120 acres of the Overpeck creek, now more like a lake, is located within Overpeck County Park. This region falls within the Atlantic flyway, the main eastern migration route for millions of migratory birds. This freshwater habitat is smack in the middle of this densely populated, overbuilt and overburdened part of Bergen County which makes the area an even more important rest stop and breeding habitat along that migration highway.

Bald Eagles Thrive on the Overpeck !

The Return of the Bald Eagle to New Jersey has never been more dramatic than on the Overpeck. Not only are there nesting Eagles located on the creek but the tall trees that line the banks of Overpeck Preserve are a critical roosting area for our nation's symbol especially in winter. In fact, on the 2026 Bergen Audubon Bald Eagle count we had 26 Eagles wintering

there in January. As it turns out, Eagle watching along the Overpeck is one of the best places to watch the magic of these birds anywhere in Northern NJ. That being said the Eagles will only continue there if the large trees along the water are kept. The removal of those trees in any future plans of the park will mean the Eagles will not return, roost or thrive in the park which will be a loss not only for our eagles but also to the people of Bergen County and the entire state.

Restored Habitat will Mean Many More Species will Thrive in the Park, Some Threatened and Endangered.

The potential benefits of ecologically restored wildlife habitat to the preserve will have immeasurable long term impacts on our wildlife. If in this plan for the park we can restore Native grassland habitat, Native wildflower and pollinator meadows and Native shrub habitat, we will help everything from Monarch Butterflies to American Kestrels, Savannah Sparrows to Meadowlarks, and Bumble Bees to Bobolinks. This habitat threatened in itself will become a haven for the many species that are now in steep decline. If we want to look for a successful model we only need to look to another place in NJ, Duke Farms, where this incredibly beautiful park and habitat has been an amazing success story for both people and nature.

Can We Accomplish a Plan Like This?

The Bergen County Executive James Tedesco along with Bergen County parks have come a long way to bringing our county park system up to its potential as true environmental stewards of our Open Space. Right down the road the Teaneck Creek restoration of a wetland habitat in the middle of Bergen County has been a shining example of what great things can be done for our environment. ***If the public will is there*** we can do amazing things together.

A Park For People too! If the Covid pandemic taught us anything it was how important our parks are to us. While sports fields, playgrounds and most everything else were closed, people discovered just being outside was wonderful and witnessing mother nature was nothing short of magical. If the preserve is restored correctly, imagine sitting on a bench watching Monarch butterflies, and Hummingbirds fly right by you or having a picnic with your children among the wildflowers, watching nesting birds raise their young or enjoying a healthy thriving population of Bald Eagles wintering along the

water's edge. Native Americans think 7 generations ahead, we will now have our only chance to do the same.

Special Interests Groups will want a piece of the pie (Or Park)

Make no mistake there will be people, groups, entities- call them what you will, disconnected from nature, wanting their own ways and ideas for the park. But if these ideas are harmful and not beneficial to a long-term environmental restoration then we need to have our voices heard loud and clear. The future of wildlife and our own quality of life in the entire region will depend on what happens at Overpeck County Park.

What Can We Do?

In the labor movement we would say "Time to Organize !" This means trying our best to speak with one voice, being clear on what we see for a better future for our park system. Eventually there will be public meetings held by the County on the future of the park, try your best to attend. Write letters to the County Executive urging the County to restore the Overpeck Preserve to all it could and should be for **People and Wildlife!**

Have Your Voice Heard!

Get all your Local Environmental groups on board. From local green teams to Environmental Commissions , school environmental clubs and religious groups, everyone that cares about gifting future generations a very special place to connect to nature. This will be our only chance, there will be no second chance and no going back.

We can and will do this together !

DON TORINO

BCAS PROGRAMS - MAY - SEPTEMBER 2026

All programs are planned for zoom at 7:30pm. Check website www.bergencountyaudubon.org for more updates and enhanced info on speakers, bios, and photos.

* * *

5/13 Teresa Doss will give us an update on "**What's New in the NJ Meadowlands**". Terry is the Director and Chief Restoration Scientist for the Meadowlands Research & Restoration Institute, of NJSEA .

6/10 Chris Garza will present "**Ornithomycology: Where Birds and Fungi Intersect.**"

9/9 Sophie Osburn will discuss her book **Feather Trials - A Journey of Discovery Among Endangered Birds**

**

For speaker and program suggestions, contact Marilyn Sadowski at 201-982-0483, msadowskibcas@gmail.com

BCAS FIELD TRIPS - MAY-JULY 2026

All field trips are rain OR shine. For additional information or to make suggestions for field trips, please contact Field Chair, **Chris Takacs at 201-207-0426 or americanchris22@gmail.com**. For a complete list of directions to field trip sites please visit www.bergencountyaudubon.org. Unless indicated, Contact Don Torino greatauk4@gmail.com (201) 230-4983

May 2 (Sat.) 11AM **Native American and Nature Day at the Butterfly Garden, Leonia.** *Rain date-Saturday, May 9th.
Learn about the cultural significance of birds to the Native American people. Explore and learn about all of the native plants and nature in and around the garden.

May 3 (Sun.) 10AM. **Richard DeKorte Park, Lyndhurst.**

May 6 (Wed.) 10AM. **Borg's Woods, Hackensack.**
Meet at the Allen Street entrance.

May 9 (Sat.) All day. Annual **BCAS Spring Count Fundraiser**, Various locations. Participants needed. Contact: Dave Hall (973) 226-7825 david.hall@einsteinmed.edu

May 9 (Sat.) 10AM. **BCAS Spring Count at Teaneck Creek Conservancy, Teaneck.** Meet in the parking lot off Puffin Way.
Contact: James Falletti (212) 203-3775 jamesfalletti@gmail.com

May 10 (Sun.) 8AM. **Mother's Day Walk at Garret Mountain Reservation, Woodland Park.**
Meet in the three tiered parking lot, entrance off Mountain Avenue.
Contact: Chris Takacs (201) 207-0426 americanchris22@gmail.com

May 10 (Sun.) 10AM. **Mother's Day at Teaneck Creek Conservancy, Teaneck.** Meet in the parking lot off Puffin Way.

May 13 (Wed.) 10AM. **Endangered Species Day** at Harrier Meadow, North Arlington.

May 17 (Sun.) 10AM. **Hackensack River County Park, Hackensack.** Entrance is behind the Shops at Riverside.

May 20 (Wed.) 9AM. **Halifax Road/Lake Henry, Mahwah.**
Park at Continental Soldiers Park.
Contact: Chris Takacs (201) 207-0426 americanchris22@gmail.com

May 23 (Sat.) 10AM. **Teaneck Creek Conservancy, Teaneck.**
Meet in the parking lot off Puffin Way.

May 24 (Sun.) 10AM. **New Jersey Botanical Garden, Ringwood.**
Meet by the carriage house.

May 27 (Wed.) 10AM. **Losen Slote Creek Park, Little Ferry.**
Park in the lot adjacent to the soccer field.
Trails may be muddy, boots are highly recommended.

May 31 (Sun.) 10AM-2PM. **Native Plant Day** at Richard DeKorte Park, Lyndhurst.
Plant walks and talks, partner information tables.

June 3 (Wed.) 10AM. **Teaneck Creek Conservancy, Teaneck.**
Meet in the parking lot off Puffin Way.

June 7 (Sun.) 10AM **Annual Bluebird Walk at the New Jersey Botanical Garden, Ringwood.** Meet by the carriage house.

June 12 (Fri.) 10AM **Celebrate Frank Chapman's Birthday** along the Frank Chapman Trail, Teaneck.
Park in the lot on the corner of River Road and Riverview Avenue.

June 14 (Sun.) 10AM **Richard DeKorte Park, Lyndhurst.**

June 17 (Wed.) 10AM **Otto Pehle Park, Saddle Brook.**
Meet in the first parking lot after you enter the park.
Contact: Chris Takacs (201) 207-0426 americanchris22@gmail.com

June 21 (Sun.) 10AM. **Father's Day Walk at Teaneck Creek Conservancy, Teaneck.** Meet in the parking lot off Puffin Way.

June 24 (Wed.) 10AM. **Flat Rock Brook Nature Center, Englewood.**

June 28 (Sun.) 10AM **Mill Creek Marsh, Secaucus.**
Park behind Bob's Furniture Store.

July 1 (Wed.) 10AM **Mill Creek Point and Schmidt's Woods, Secaucus.**

July 5 (Sun.) 10AM **Frank Chapman Trail, Teaneck**
Park in the lot on the corner of River Road and Riverview Avenue.

July 8 (Wed.) 10AM **Teaneck Creek Conservancy, Teaneck.**
Meet in the parking lot off Puffin Way. Contact: Don Torino

July 12 (Sun.) 11AM . **Butterfly Walk at the New Jersey Botanical Garden, Ringwood..** Meet by the carriage house.

July 15 (Wed.) 10AM. **Native Plant and Butterfly Walk** at Richard DeKorte Park, Lyndhurst.

July 19 (Sun.) 10AM **Teaneck Creek Conservancy, Teaneck.**
Meet in the parking lot off Puffin Way. Contact: Don Torino

July 22 (Wed.) 6:30PM . **Evening Walk at Richard DeKorte Park, Lyndhurst.** *Please note, this is an evening walk. .

July 26 (Sun.) 10AM-3PM 17th **Annual Butterfly Day at Richard DeKorte Park, Lyndhurst.**
Celebrate all things butterfly with walks, talks, children's activities, children's costume contest (12 and under), information tables, music and more. Contact: Don Torino

July 29 (Wed.) 10AM **Mill Creek Marsh, Secaucus**
Park behind Bob's Furniture Store. Contact: Don Torino

EDUCATION

MARIE LONGO, Chair

A Word About Citizen/Community Science-

Citizen/Community Science plays a vital role for nature. Documenting and reporting your sightings make a real difference and is a simple way to contribute. There are so many ways to help, anyone can contribute, anywhere you are. Scientists and researchers cannot possibly be everywhere, and our contributions are so important. I cannot stress the importance of citizen science enough. Need suggestions? Reach out to me, I'd be happy to help, mlongo8383@aol.com.

World Migratory Bird Day 2026 to Highlight Important Role of Community Science in Bird Conservation

The theme for World Migratory Bird Day (WMBD) 2026, "Every Bird Counts – Your Observations Matter" highlights the role of public participation in collecting data on migratory bird populations and their habitats and factors that impact their populations and contribute to our knowledge about how to protect them. Community science, ranging from backyard bird counts to large-scale coordinated surveys, provides information on species distribution, abundance trends, migration timing, and breeding success. This data is important to identify conservation priorities, and inform effective conservation action plans and strategies.

By engaging individuals and communities in monitoring efforts, we not only gather scientific data but also build a deeper connection to nature, raise awareness about the challenges migratory birds face, and inspire direct conservation action.

The National Audubon Society is a program sponsor of World Migratory Bird Day. To learn more about World Migratory Bird Day visit migratorybirdday.org.

The Great Backyard Bird Count Final Results-

Thank you to all who participated in the GBBC this year. This is one example of how citizen/community scientists can contribute. Here are the final results.

8,257 species of birds identified, **216** countries of eBird subregions, **467,696** eBird checklists, **1,239,329** saved Merlin IDs (step-by-step, sound or photo). **246,225** photos, videos, and sounds added to the Macaulay Library, **1.146.284** estimated global participants, **435** reported community events.

Certified Wildlife Garden Program-

Our certified gardens number 272 in seven states. Creating much needed habitat for birds, pollinators and wildlife is crucial. Whether your garden is on a terrace, in a pot or in a large backyard, it can become certified. Pocket parks are being created in communities where wasted space is being transformed into pollinator habitat. Schools, libraries businesses and more are eligible to apply.

It's easy to apply, visit bergencountyaudubon.org/cwg/ for an application and to learn more. Once approved, you will receive a free garden sign to display in your yard.

SAVE THE DATES

May 2 (Sat.) 11AM **Native American and Nature Day at the Butterfly Garden, Leonia.**

May 9 (Sat.) All day. Annual 34TH **BCAS Spring Count and World Migratory Bird Day.**

May 31 (Sun.) 10AM-2PM. **Native Plant Day** at Richard DeKorte Park.

July 26 (Sun.) 10AM-3PM 17th **Annual Butterfly Day at Richard DeKorte Park,**

Oct 4 (Sun) All day . Meadowlands Birding Festival, Richard DeKorte Park.

FUNDRAISING

TAMMY LAVERTY, Chair

Bergen County Audubon Society is thankful to all our members who so generously donated to help BCAS with its missions. We are planning another active year with wonderful walks, events, educational opportunities, and strong efforts to improve wildlife habitat. Again, thanks to all of you who make it possible.

FUNDRAISING IQ 2026 (1/3/26 - 3/26/26

TOTAL \$1,647.00

DONATIONS: GENERAL, YEAR END, MONTHLY, WEBSITE, CHECKS, ETC = \$972

Renee Cannon, Pedro Cruz, Marianne Herrmann, Anna Kurz, James Lignal, Monica Maley, Daniel T. Montella, Eugene Ottens, Karl Soehnlein, Sandra Wolkenberg

2026 BCAS SPRING COUNT ON MAY 9 - BIRD-WATCHERS WANTED!

Please volunteer for the 34th Annual “Spring Count”. This is a celebration of World Migratory Bird Day.

It will be held Saturday, May 9, rain or shine. Similar to last year, we invite participants to view birds in your local park, your yard, or in one of the larger natural areas in Northern New Jersey, such as Garret Mountain, Oradell Reservoir, Teaneck Creek, DeKorte Park, Losen Slote, or the Celery Farm. But we would also love to send people to other promising habitats such as MahWah/Ramapo, Flat Rock, Greenbrook, Van Saun Park, Tenafly Nature Center, the Hudson River shoreline, or even further afield. The goal is not only to identify as many bird species as possible, but to estimate the number of birds per species that you have found in your territory. This event will also be the basis for our Spring Fundraiser shown below.

Invite a friend to join you. Tell me in advance (by email, please) where you plan to be birding, and I may be able to match you with other birders with the same goal. If you send an email in advance of the event, I can also share a report form to record your birds. After May 9, please send back your findings to **Dave Hall** (973 226-7825) david.hall@einsteinmed.edu, including a clear account of where you were birding.

May brings us a wonderful selection of birdlife, and this event can be a fun way to practice your bird identification skills. The more the merrier!

DAVE HALL

BCAS SPRING FUNDRAISER - SATURDAY, MAY 9, 2026

Pledge your support for BCAS and all our conservation and education projects by sending in this form or using our website.

You may pledge "X" amount per species and your donation will be multiplied by the total number of species seen on that day, or you can pledge/donate a fixed amount. Your donation is fully tax deductible. Please consider using a “Matching Grant” from your employer. Checks should be made payable to Bergen County Audubon Society.

1. Mail form/check to BCAS Spring Fundraiser
P.O. Box 235
Paramus, NJ 07653-0235 or
2. Use the donate button at www.bergencountyaudubon.org.

We appreciate any donation you can make and if your financial situation is limited we appreciate that too, but hope you can still go birding and help with the data collection and enjoy the spring migration.

Pledge- per species amount \$ _____

CAUTIOUS OPTIMISM FOR MONARCHS

There may be hopeful news for the future of the Monarch butterfly. Journey North reports an increase in Monarch roosting area in Mexico this past winter. Numbers of Monarch butterflies are estimated by the total area occupied by trees with clusters of butterflies. Comparisons are made from year-to-year. During the 2025-26 winter, the territory increased by 64% as announced on March 17. This represents the population of Monarchs east of the Rocky Mountains. Western population numbers remain in decline, but the news for the eastern butterflies seems positive and is consistent with trends over the past decade, with incremental gains. Scott Black, director of the Xerces Society for Invertebrate Conservation writes, “While an increase is great news, the numbers in Mexico are still well below historic norms.”

The number of Monarchs that arrive in Mexico each autumn is determined by how the population has fared over the past year. During their journey north, the butterflies have produced three generations of young before they migrate south to Mexico to overwinter. The numbers of young and their survival are dependent on many variables. These include availability of proper habitat, weather conditions, presence of environmental toxins, disease, predators, and man-made hazards. Climate change can affect the population in various ways.

Conditions in drought-prone areas of the mid-west were less severe in 2025 than the previous year. Wetter weather allowed second and third generations of Monarchs to succeed and survive through Texas to reach the overwintering grounds.

Credit also goes to efforts by people to restore habitat throughout the breeding and migratory range of Monarchs.

These grassroots projects by towns, churches, scouts, schools,

and utilities do have a positive result. Recommendations not to hand-rear Monarchs may also factor in. Information on agricultural pesticides is not readily available as government agencies no longer collect that data. *Photo Jim Macaluso.*

Planting native milkweed and nectar plants is the best course we can take to help Monarchs and other butterfly species survive. Be aware that cultivar plants, or “nativars,” are not equal to actual natives. Depending on the qualities developed in the cultivar, it may prove useless to pollinators. For information on beneficial plants, see

<https://xerces.org/publications/plant-lists/native-plants-for-pollinators-and-beneficial-insects-mid-atlantic>

Meanwhile, the US Fish and Wildlife Service proposed listing the Monarch as a threatened species under the Endangered Species Act in December of 2024. With the comment period finished, the decision to list the species remains delayed. Given official protection, habitat safeguards could be enforced. This would be a boon to the species, but especially valuable in preserving the western population.

THE DAZZLING BALTIMORE ORIOLE

By Maggie Estrada, 7th grade

The male Baltimore Oriole’s brilliant orange and jet black plumage is unmistakable. The wings are black and have white bars, and the tail is orange and black. Not too far away, you might spot the female whose colors are more subtle, yellow-olive on the head and back, dull orange-yellow on the breast and belly, with white on the wings. She might be weaving her incredible nest. The nest she weaves is a hanging, pouch-like nest high up in the trees to protect her eggs from predators. The nest can take about a week to make.

Baltimore Orioles are omnivores and like sweets such as nectar and fruit. They enjoy dark-colored fruit the most, such as dark mulberries, red cherries, and deep-purple grapes. They are easily lured to backyard feeders. They also enjoy insects such as caterpillars. They spend most of their time high up in the trees and are often found near rivers, parks, and forests. The flute-like whistling song or chatter call of the Baltimore Oriole echoes from treetops near parks and residential homes.

A reliable sighting for the Baltimore Oriole is in early May through July. Aim your eyes high when looking for Baltimore Orioles and listen for their distinctive chatter. **Happy Birding!**

BOY SCOUT NEWS

BCAS Partners with Maywood Eagle Scout

by Ronald Durso, BCAS Member & Troop 1200 Scout Leader

August 2025 marked the culmination of another Eagle Scout partnership between BCAS and Scouts BSA Troop 1200 in Maywood, NJ. This project began in the early frigid days of January 2025 when Don Torino and Tammy Laverty met with Life Scout, Zach Durso at the Butterfly Garden at Overpeck Park. Don and Tammy

toured Zach around the garden and the plans for a shaded pergola began. When Zach better understood the way that the garden was used, he suggested upgrading the main trail through the garden and repainting the picnic tables as well.

During winter Zach designed the pergola and requested donations of supplies. Zach held one fundraiser where he and the Troop sold decorative bird houses at the BCAS Native Plant Day at DeKorte during the Spring. By Summer, Zach had visited the site several times with Don and Tammy. He had arranged with the County for the donation of the rocks for the trails. Benke's hardware had given him a discount on the lumber for the pergola. The construction plans had been revised a few times and approved by the BCAS. The County agreed to loan the Troop a golf cart to move the rocks from one side of the park to the Garden.

Over the course of two and a half days, the project build was complete. Zach led a team of Scouts and adults in cutting and

dry-fitting the Pergola at his Maywood home. A week later, he led a team of Scouts, friends, family, and adults through a busy and fruitful build day at the garden. The hardest part, by far, was moving the rocks to complete the path. The most rewarding part was the completion of the pergola which now serves as a substrate for native plants which will attract pollinators and provide shade to those who visit the garden. As with any project, a final design edit was needed after build day where a small group returned to the garden to add an additional engineering support to the pergola. By August, the project was complete and Zach was able to donate an overage of \$450 to BCAS. Thank you Zach.

When people hear about an Eagle Scout Project, they sometimes ask what the Eagle Scout built. But an Eagle Scout project is so much more. It is a leadership project which brings the community together. All total, Zach led 45 people for over 400 service hours on this project. More people are now aware of the beautiful butterfly garden at Overpeck Park and more people understand the important role that conservation plays.

Scouts BSA Troop 1200 would like to thank BCAS for their support in helping our Scouts develop their leadership skills.

NJSEA AND TROOP 223 FROM WEEHAWKEN, NJ AT RICHARD DEKORTE PARK.

Eddie Fox is project leader for Scout Troup 223. Their Scout Leader's name is Steve Fox,

Eddie and his fellow scouts worked on creating floating islands with the help of NJSEA. NJSEA sponsors included Terry Doss and team members, Henry Pullin and Drew McQuade. Eddie described the project as follows: "My project was a floating wetland island made of PVC pipe, pond filter foam, and coir fiber. The island will create habitat for reptiles, amphibians, birds, and bugs. It will also help create habitat for the Northern Diamondback Terrapin. It will offer food and shelter as well, and will create spawning grounds for fish. The island promotes microorganism growth and will attract pollinators. These islands will also help clean water quality, by trapping and absorbing excess nutrients from the water as well as toxic chemicals/heavy metals, and cleaning the local environment." **From left-right, Eddie Fox, NJSEA crew Launching islands, Troop 223 Scouts, Islands in full growth bloom.**

THANKS TO BOTH TROOP 223 AND TROOP 1200 FOR THEIR DEDICATION AND HARD WORK TO PRESERVE OUR NATURAL WORLD.

As Members of Bergen County Audubon Society, we share a love for birds and a concern for the environment. Our mission is to promote and protect wildlife in their natural habitat by providing opportunities for observation and conservation.

All field trips and programs are open to the public and free of charge.

MEMBERSHIP APPLICATION 2026

Please enroll me as a member of the Bergen Audubon Society and/or the National Audubon Society. My check is enclosed for:

Chapter Sustaining Member. \$20.00 - Single or \$35.00 for Family Membership. All funds stay in our area, helping us to support local efforts and provide services in Bergen County. Make check payable to Bergen County Audubon.

\$20.00 - National Audubon Society Member. (1st year rate for new NAS members only). Includes Chapter membership. Make check payable to National Audubon Society.
